CAREER SUMMARY

Results-driven technical analyst passionate about delivering value to clients and enabling teams to succeed in a fast-paced environment. 2+ years of experience in leading agile teams to sustained success across roles at both start-up and Fortune 500 level. Seeking to bring a leadership mentality backed up by strong full stack development skills and experience to achieve and exceed expectations at the highest level.

EDUCATION

Penn State University: 2017 – 2021
State College, PA
B.S. Information Science and Technology,
Minor in Economics

CERTIFICATIONS

- AWS Certified Solution Architect Associate
- Scaled Agile Framework (SAFe) 5 Scrum Master
- IC3 Digital Literacy
- Currently preparing for AWS Solution Architect Professional

KEY ACHIEVEMENTS

- 2019 HackPSU Hack-a-thon Winner
- 2020 Penn State College of IST Entrepreneur-In-Residence
- 2017 National Technology Student Association Software Development Award

PROFESSIONAL EXPERIENCE

Accenture – Advanced Application Engineering Analyst *June 2021 – Present*

Workstream Delivery Lead

April 2022-Present

- Managed 13 developers (4 onshore, 7 offshore, 2 client FTEs) across 2 teams as a scrum master and delivery lead for a Fortune 100 Telecomm client
- Enabled sustained above-baseline velocity across several quarters despite resource turnover due to larger org changes
- Drove quarterly planning processes for team including delivering feature LOE estimations and working with the business in “draw-the-line” activities
- Exceeded in 100% client-facing roles – frequently working with senior client and account leadership to ensure team was meeting SLAs

Full Stack Software Developer

June 2021-April 2022

- Played key role in getting client over the finish line for initial launch of a first-of-its-kind virtual assistant product, lending platform expertise which prevented expected delays in launch
- Drove integration of payment microservices in virtual assistant to enable self-service for users in collections process, reducing live agent interactions by 2 million per year

Maverick Software Systems – Founder

April 2018 – January 2021

- Developed software platform to assist hospital firms in quality-of-care risk mitigation by interpolating clinical outcomes from electronic health record systems
- Research and product featured at World Health Informatics Congress (MedInfo) in 2019 and the February 2020 Penn State University Board of Directors meeting
- Performed lean customer discovery across both clinical and technical disciplines
- Specialized in integration of third party software platforms with electronic health record systems using the FHIR-HL7 standard and industry best practices

SKILLS

Software Development

Front End: HTML, CSS, JavaScript, TypeScript, React, Redux, Vue, Vuex, Electron

Back End: Java, C#, NodeJS, WebSockets, MySQL

Cloud: AWS EC2, AWS DynamoDB, AWS solution architecture

Architecture: Microservices (development/implementation), application design patterns, async programming/multi-threaded applications

Interpersonal

Strong public speaking/presentation skills. Committed to leadership mindset – leading by influence & trust instead of title. Constant desire to learn new technologies and broaden horizons
