- Currently preparing for Project Management Professional (PMP) Certification exam.

SKILLS

Software Dev: Java, JavaScript (React/Node.js); Data-driven app development with MySQL and SQLite; SQL.

Cloud: AWS, primarily EC2, RDS, DynamoDB; Held AWS Solution Architect Certification from 2021-2025.

Project Management: Jira and Confluence, including backlog maintenance and dependency maintenance, advanced JQL, macro configuration, and Jira/Confluence integrations; Microsoft Project; Microsoft Visio.

PROFESSIONAL EXPERIENCE

Citi – Tech Project Manager, Master & Reference Data Irving, TX; 2023 – Present

- Managed 3-4 financial reference data projects simultaneously. Key deliverables addressed OCC/SEC regulatory requirements, drove revenue initiatives, executed legacy system retirements, and resolved data quality issues across Citi's Markets and Services businesses.
- Orchestrated all steps of the SDLC including requirements gathering, budget and resource planning, project governance, and proactive risk, stakeholder, and change management for projects totaling over \$4M annually.
- Organized and led strategic planning initiatives, building consensus between front, middle, and back-office stakeholders towards a joint technology road map aligned with business and firm.
- Led integration of AI tools into PMO workflows including development of standardized portfolio status and budget reporting, synthesizing project schedule and financials data across Jira, Confluence, and internal project tracking software platforms.

Accenture – Senior Analyst, Software Engineering Philadelphia, PA; 2021-2023

- Managed 10+ developers as delivery lead for a Fortune 500 client.
- Drove quarterly planning processes including roadmap refinement, delivering effort estimations, and working with the business in "draw-the-line" activities.
- Played key role in design and implementation of payment microservices which reduced live support agent interactions by 2 million per year.

Maverick Software Systems – Founder State College, PA; 2019– 2021

- Developed software platform to assist hospital firms in quality-of-care risk mitigation by interpolating clinical outcomes from electronic health record systems.
- Led overall product strategy with primary focus on customer discovery and product adoption.
- Designed and prioritized new platform features to align product vision and core functionality with revenue-generating leads.
